2007 Print Prices

Most images displayed on my website, as well as those available for licensing thru Alamy and other agencies, are available as prints for noncommercial display purposes. Not all images are available in all sizes; please contact me with your specific requirements.

Unless other arrangements have been made, all prints are delivered unmounted, unmatted, and unframed. Typical lead time is three weeks, but can be longer under some circumstances. I do maintain a small inventory of popular prints in popular sizes, so some prints may be available immediately.

Most prints from color negatives are made optically, on an enlarger. Prints from slides and transparencies are made digitally, from corrected and adjusted high-resolution scans, output onto traditional color photo paper. Prints from B&W negatives are made optically on an enlarger on RC paper. White borders and matte surfaces are available upon request, but are not standard. For B&W prints, fiber papers are twice the listed price.

5 x 5	\$10
5 x 7	\$15
8 x 10	\$20
10 x 10	\$25
11 x 14	\$30

If you aren't local, any number of unmounted prints can be shipped in North America for \$5, including insurance. Overseas shipping is \$8 per order.

Mounting and framing are generally left to the purchaser. However, matted and framed prints are available. To simplify things and keep costs down, I've standardized on a single mat – black, white-core acid-free – and a single frame style – gloss black aluminum, Nielsen profile 1100. The standard framing offered is single matted with 2 1/8" border all around, with acid-free backing board and Lucite. Cost for matted and frames prints is twice that of an unmatted print above, so 11x14 prints matted to 15x18 and framed are \$60. Because of their weight, domestic shipping for framed prints is \$10 for up to three prints 8x10 or smaller, and \$10 per print for larger sizes.
